

OS50: OpenStack Fundamentals

A one-day introduction to the fundamentals of OpenStack

This OpenStack primer is a revised version of our top selling **OpenStack Bootcamp I (OS100)** course with focus on developing business perspectives and understanding the basics of OpenStack. This course is intended for OpenStack end-users such as project managers, business developers, and sales engineers who require cloud platform operational skills and a high level understanding of cloud computing internals, using OpenStack. The course is broken up into two sections: **lectures** and **labs**.

The **lectures** provide students with the basics of cloud computing, OpenStack business values, OpenStack Overview, and the OpenStack Ecosystem.

The **labs** provide students with hands-on experience using Horizon dashboard to provision your own cloud resources like virtual machines, virtual networks, and block storage. Students will also gain experience managing their own application image repository.

This quick yet comprehensive introductory OpenStack basics course is led by Mirantis engineers. Passionate about teaching, every Mirantis instructor is committed to helping IT professionals of all skill levels advance their expertise in OpenStack, offering individual help and facilitating students in understanding class materials.

Course Details

- Duration: 1 Day
- Hours: 9:00 a.m. - 5:00 p.m.
- Price: 7,500 THB / Person

Prerequisites

- None
